

Bandit Model 2900XP Track Stump Grinder

The Bandit 2900XP Track is the ultimate back yard and land clearing stump cutter. The rubber tracks with close up to 89cm wide for the tight jobs, then expand to 134cm to provide maximum stability on uneven ground. A powerful, smooth CAT 114hp turbo diesel engine has massive torque for rapid stump removal. The 2900XP features Omnex brand Radio Remote Control of all engine and grinder functions as standard to ensure a clean and safe work environment for the machine operator. The 2900XP's Hydrostatic drive system is fitted with oversized hydraulic pumps and motors, with a large hydraulic oil cooling system as standard. The hydrostatic system is extremely reliable and reduces maintenance costs to a minimum. Greenteeth 1100 series stump teeth provide tremendous cutting ability and match the 2900XP's power perfectly for maximum cutting.

The Bandit Model 2900XP is built with the quality you come to expect with all Bandit products. Bandit strives to build all of its units with the highest quality components, which is why Bandit machines last longer and command top re-sale values.
